## WHAT WE DO

Pneumatic and mechanical conveying systems and machinery, with the relevant accessories.

Specifically, pneumatic conveying systems for bulk powder as well as size materials.

Mechanical conveying systems and machinery, rubber and steel-plates belt conveyors, screw conveyors, elevators, vibrating feeders.

Special process machinery.

Continuous or batch dosing and weighing systems.

Limit switching systems, shape and wear monitoring, with integrated infrared technologies, mass or flow rate measure monitoring.

Sampling systems.

Steel structures and structural engineering.

Standard equipment, UNI, DIN, ANSI, ASME.

Special components.

MCC and PLC electric panels.

## MISSION

ROSADA ILS intends to effectively answer to the needs of the market and industrial production, providing high professional and technological services, compliant with the best required standards and the European laws for quality and safety.

rosadails.com

## SERVICES

Process, project and detail engineering.

PED, ATEX, CE Certification.

Site erection and installation.

“Global Service” technical and maintenance assistance.

Site supervision.

Commissioning and training.

Spare parts service.

## WHERE ACTIVE

In all industrial fields with equipment and technology that is necessary for those systems performing the need and problems of conveying, feeding, storing and dosing raw as well as recycled materials, waste, slurry etc.

## COMPETITION and RESEARCH

ROSADA ILS can offer state-of-art service to market, concerning engineering and industrial processes, as it is specialized in 3D advanced modeling and calculation as well as in process and dimensioning tools.

More, founder's relevant experience is such that the Company can screen and strengthen partnership agrees with the most qualified suppliers in the several fields.

A natural inclination to research, technical and technological innovation and a continuous personnel training, comes together with the state-of-art, in order to effectively hold a position of strong competition and a drive to the "new" and the optimization of the internal company processes.

## MAIN ACTIVITIES

System analysis and design, feasibility studies and budgeting.

System flow-sheets to support quotations, list and description of the equipment and instruments in order to assist the Production as well as Maintenance technical offices of our commitment.

Definition and dimensioning pneumatic conveying systems, with dense, medium or dilute phase, pressure or vacuum technology, eventual in-line activation, optimization of gas/solid ratio and conveying velocity.

Definition and dimensioning mechanical conveying systems.

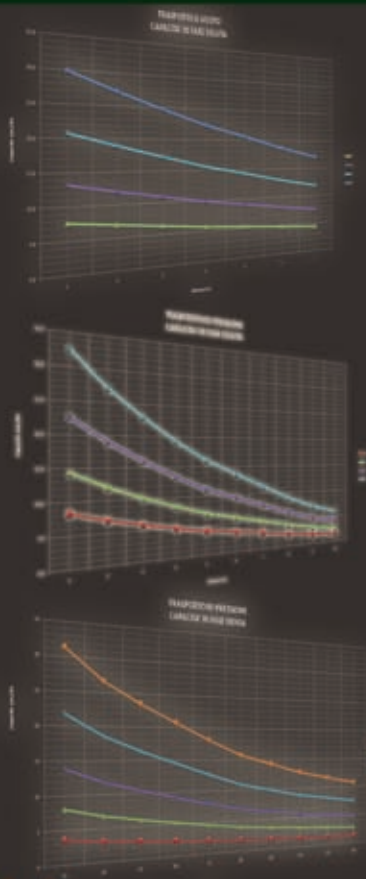

Definition and dimensioning industrial weighing and dosing systems.

Shop drawings and structural engineering for every industrial field.

Components and equipment Research and Development, prototyping and customized machinery.

Marketing and technical-sales development in the main industrial fields.

Manuals and CE, ATEX, PED certifications.

## GLOBAL SERVICE

In every moment of its systems and machinery life-cycle, ROSADA ILS is present with qualified personnel, with whom it consolidated competence and reliability relationship destined to long lasting.

We offer technical and maintenance assistance, in a "Global Service" relationship, with surveys and costing, product commissioning as well as optimization of pre-existing performances.

Our Service Dept. Is al always at your disposal to verify the system functioning and the rapid supply of the necessary spare parts.

**Trust us. It is a guarantee to be never left alone.**
